# REPORT AND PRESENTATION 3

SWENG 481/CMPSC 485

# Timetable

- Schedule presentation 3: Week of February 16th
- Presentation 3: Week of February 23rd.
- Report 3: Sunday February 22nd.
- Report 3.5: Sunday March 14th.

# What is in Report 3.0?

- Some reminders:
  - *Major changes summarized in the section Report Revision History*
  - *Has report been thoroughly revised to reflect the changes of user requirements, if any?*
  - *In case user requirements have been changed (or newly added), did the team refine them into system requirements, and revise the system design to incorporate the changes?*

# What is in Report 3.0?

- Some reminders:
  - *Research updates are documented in Section 5.*
  - *System designs are documented in Section 6.*
    - ***Make sure to explicitly discuss the use of design patterns.***
  - *Has report been thoroughly revised to reflect any changes made in system development?*
  - *Most test case designs, and execution reports are documented in Section 8.*
  - *Sections 1-10, and all appendices are revised to reflect new changes along the agile process*

# To include

- 1. Abstract
- 2. Revision History
- 3. Problem statement
- 4. Requirements
- 5. Exploratory Studies
- 6. System Design
- 7. Implementation (except 7.5: Analysis of Key Algorithms)
- 8. System Testing
- 9. Challenges (except 9.3: Open issues)
- 10. System Manuals (except 10.2: Instructions for Deployment and 10.3: Instructions for users)
- 11. Not required
- 12. References
- 13. Log sheets
- Appendix U , R, T, TE

# More Notes on Report 3

- Don’t forget to include design patterns.
- Implementation: you are expected to have around 60 to 65% of the functionality implemented.
- Test cases: more (much more) than 10 test cases for each team.
- Tests should be more elaborate. Different types of tests: unit, integration, system and maybe even acceptance.
- Make sure that the execution reports of old tests have recent entries.
- Rubric, Rubric, Rubric

# Traceability

| Project Name: | Impacts of Autonomous Vehicles on Consumers and I |
|---|---|
| Requirement #: | UF-A |
| Creation: | |
| Modification: | |
| Description: | The user is able to import files containing vehicle sensor data. |
| Priority: | ✔ Highest / High / Medium / Low |
| This Req. is Refined Into: | SF-A-01, SF-A-02 |
| Justify why UF-A can be completely covered by SF-A-01, SF-A-02 | User imported files will always be the cor imported data will always be valid data. Bot user to only import valid files containing v |
| Traceability: | Use cases cf.: UC-001 |
| | Test cases cf.: TC-001, TC-002, TC-003 |
| Acknowledgment | *Generated from the CapStone Process Management System ©2015* |

| Project Name: | Impacts of Autonomous Vehicles on Consumers and Insurance | | | | |
|---|---|---|---|---|---|
| Requirement #: | SF-A-01 | | | | |
| Creation: | | | | | |
| Modification: | | | | | |
| Description: | The system checks for file corruption. | | | | |
| Priority: | Highest | ✔ High | Medium | Low | Lowest |
| This Req. is Engineered From: | UF-A | | | | |
| Justify why meeting SF-A-01 can contribute to the fulfilment of UF-A | This prevents system crashes and inaccurate data comparisons. | | | | |
| Traceability: | Use cases cf.: UC-001 | | | | |
| | Test cases cf.: TC-003 | | | | |
| Acknowledgment | *Generated from the CapStone Process Management System ©2015* | | | | |

| Type | Functional | Non-Functional |
|---|---|---|
| User | ☐ | ☐ |
| System | ☒ | ☐ |

| Project Name: | Impacts of Autonomous Vehicles on Consumers and Insurance | | | | |
|---|---|---|---|---|---|
| Requirement #: | SF-A-02 | | | | |
| Creation: | | | | | |
| Modification: | | | | | |
| Description: | The system checks that the file is of type .dbc (database file). | | | | |
| Priority: | ✔ Highest | High | Medium | Low | Lowest |
| This Req. is Engineered From: | UF-A | | | | |
| Justify why meeting SF-A-02 can contribute to the fulfilment of UF-A | By making sure the file types are .dbc it guarantees comparable files are being imported. | | | | |
| Traceability: | Use cases cf.: UC-001 | | | | |
| | Test cases cf.: TC-001, TC-002, TC-003 | | | | |
| Acknowledgment | *Generated from the CapStone Process Management System ©2015* | | | | |

| Type | Functional | Non-Functional |
|---|---|---|
| User | ☐ | ☐ |
| System | ☒ | ☐ |

| Name: | Impacts of Autonomous Vehicles on Consumers and Insurance |
|---|---|
| ID: | UC-001 |
| Name: | Import files |
| User Goal: | System prompts user to import file then checks for its validity before loading the data. |
| | File selection |
| | Primary task |
| r Reqs: | UF-A |
| tem Reqs: | SF-A-01,SF-A-02 |
| r: | Client/User |
| : | Application should be running and database files should exist. |
| rantee: | Error message displayed and prompt user to select different file |
| rantee: | The data from the file is loaded and displayed |
| | Displayed automatically when program is started |
| nario: | |

| Step | Actions |
|---|---|
| 1 | The system prompts the user to select two files to import |
| 2 | The user browses the end-system for a file |
| 3 | The system checks for valid file type |
| 4 | The system loads and displays data from file |

| Extensions: | Branching Scenarios |
|---|---|

# Presentation 3 Scheduling

- Each team should start scheduling their presentation on Monday Feb 16th **and not before.**
- The presentation will be on the week of Feb. 23rd.
- The presentation will be for 1 hour.
- Your faculty advisor and co-advisors will attend the presentation. Invite your industry mentor.

1. Use outlook to schedule your presentation.
   - *Reference the instructions in Canvas and inside Week 7.(Fall)*
2. After you have a presentation scheduled, you need to reserve a room. The instructions on how to reserve a room is available at https://sites.psu.edu/seniordesignstudentresource/room-reservations/
3. After you reserve the room, make sure to update the invite from Step 1 to include the room number.

# Notes on Presentation 3

- Some reminders:
  - *Review needs*
  - *Review requirements*
  - *Review system design (architectural, data models, structural and behavioral)*
    - Make sure to discuss the use of design patterns.
  - *Discuss any changes*
  - *Discuss updated research*
  - ***Focus on implementation, testing***
  - ***Demonstrate working features***
  - ***Report progress status***
    - **What requirements have been met?**
    - **Project challenges?**

# Presentation 3: suggested topics

Make each slide **legible**

- *Title*
- *Presentation outline*
- *Review of project statement and broader impact*
- *Review of the requirements*
  - *Include requirements trace table.*
  - *Include use case diagram.*
  - *Highlight any changes you have made.*
- <u>Updates on Exploratory Studies</u>
- Architectural design
  - *Give your architectural diagram*
  - *Highlight any changes you have made.*
  - *Discuss patterns.*
- Structural design
  - *Class diagrams*
  - *DB schema design, if applicable*
  - *Highlight any changes you have made.*
  - *Discuss patterns*

# Presentation 3: suggested topics

Make each slide **legible**

- UI design
  - *Give screen shots of your UI design*
  - *Highlight any changes you have made.*
- Behavioral design
  - *Can include interaction diagrams*
  - *Can include state diagrams*
  - *Can include activity diagrams.*
  - *Can include Web flow design in UML state diagram, if applicable*
  - *Highlight any changes you have made.*
- Test-driven development & Test case design
  - *Show summary tables of your test suits and test cases.*
  - *Show examples of your test cases and test execution reports.*

# Presentation 3: suggested topics

Make each slide **legible**

- Updates on system implementation progress
  - *Tools and technologies*
  - *Discuss implemented requirements.*
  - *Discuss percentage of completion.*
  - *Discuss what will be implemented next.*
- Challenges
  - *Discuss challenges you faced.*
- Demonstration of implemented system feature(s)

# Presentation 3

- Schedule for 1 hour
- Plan for 35 minutes for the presentation.
- If outside 8-5 make sure to get approval before scheduling.
- Invite your industry mentor.
- Don’t forget the outline
- Give detailed overview.
- Progress is important.
- Challenges are essential.
- At least 60% is the goal.
- Make sure to print your presentation slides.
- Rubric, Rubric, Rubric

# Reminder

- No class next week. I will give you the time to attend the career fair.
- No class during presentation week.
- Week 8: Teams 6 and 7 Forum presentations

# Additional Notes

- We are offering an elective in the summer – SWENG455
- Who has AI in their project?
  - *In what capacity?*

# Questions!
